Objectives

As a Full Stack Developer, I am seeking a position as a software developer. I value meticulous work and collaboration to successfully complete projects. I engage in personal projects to hone my skills and master all stages of web application development, from needs identification to final development and backend, including maintenance.

Projects

Gym Website | HTML, CSS, JavaScript & NodeJs

- Created using HTML, CSS, and JavaScript with NodeJs for server management. Developed an API for registration management and online payments via the Stripe platform. This group project allowed me to test and sharpen my web development and database management skills both server-side and client-side using Git for version control.
- This project enabled me to apply and test the concepts learned in class for better application and understanding of known basics such as UI design, JavaScript, and its frameworks.

Event Website | ReactJs with NEXT.JS

- Created a showcase site that highlights various events on the homepage. This project was developed with ReactJs, Next.js, CSS, and Bootstrap.
 - This project allowed me to better understand the concepts and functionalities of ReactJs and Next.js. It also helped improve my design and programming logic skills.
-

Canadian Experience

Sales Associate | CANEX CFMWS

12/2023 – Present

- Managed customer claims with empathy and composure.
- Actively participated and contributed valuable input in the development of new practices.

- Promoted the products and services offered by the establishment.
 - Processed various documents and entered information into the database.
-
